

# Clive's (GM4FZH) Disposal Sale

I have been looking at all the items I have accumulated over the years and decided it is time to get rid of the surplus. The following is a list of those items for which I would like offers. It is up to you to arrange transport. Contact me for further details.

## Antennas:

70 cms Parabeam by Jaybeam (model PBM18/70), 18 elements. Some spares included. Already assembled.

HF vertical, Hygain 14 AVQ, for non-WARC bands. With manual. Partly dismantled.

23 cms home-brew 26 element beam. Already assembled.

## Coaxial Cables:

Heliac LDF4-50, approx. 23 m. N male connectors both ends.

Flexible Heliac FSJ4-50, approx 5 m, N male connectors both ends, one is a right angle connector. There 2 off of these cables.

Flexible Heliac FSJ4-50, approx 10 m. NO connectors

Flexible Heliac FSJ4-50, approx. 7.5 m. NO connectors.

## Amplifier:

HF Amplifier, RM BLA300. Internal mains power supply. Input 1 – 25 W, output 250 – 300 W. All transistor. With manual.

## Preamplifier:

23 cms preamplifier in plastic housing with two changeover relays. Requires 12V control signal. Preamplifier design by Sam Jewell (G4DDK). Built from the kit and could do with checking alignment. Relays are type CX250-D, 12V dc.

## Sequencer/Controller:

Mutek /ATCS 500s, a comprehensive antenna changeover sequencer/controller unit. I have no means of testing it but can provide some documentation.

## Phasing Harness:

TRS type MH2-160, frequency range 145 – 180 MHz. Never been used. N connectors.
